

## **REGULATION II PROHIBITIONS**

### **Rule 210**      **Specific Contaminants**

#### **A.      Sulfur Compounds**

A person shall not release or discharge into the atmosphere from any source of emission whatsoever, sulfur compounds, calculated as sulfur dioxide (SO<sub>2</sub>), in excess of 2000 parts per million by volume (0.2%) of exhaust gas.

#### **B.      Combustion Contaminants**

A person shall not release or discharge into the atmosphere from the following sources or units thereof, combustion contaminants calculated at 12 percent carbon dioxide (CO<sub>2</sub>) in excess of:

1.      Wood Fired Boilers and Incinerators: 0.2 grains per cubic foot of dry exhaust gas at standard conditions.
2.      All Other Sources: 0.1 grains per cubic foot of dry exhaust gas at standard conditions.

C.      Particulate matter emitted from a source or combination of sources in which exhaust gases from a combustion unit or process are used to dry, calcine, pyrolyze, sinter or otherwise thermally condition, exclusive of combusting any process material, shall be excluded from calculation as combustion contaminants.
