PUBLIC NOTICE

The Northern Sierra Air Quality Management District's Hearing Board will hold a Variance Hearing to consider a petition by American Renewable Power (ARP, a biomass-fired power plant in Loyalton, CA) to extend the compliance date for a variance previously issued for the period March 5, 2019 until December 1, 2019. The variance would allow a required source test (emissions measurement) to be postponed until no later than March 4, 2020, in order to give ARP additional time to procure sufficient representative biomass to perform the test. Additional information is available at www.myairdistrict.com/index.php/public-notice. The hearing will be held via teleconference on January 17, 2020, at 10:00 AM at 200 Litton Dr., Ste. 316, Grass Valley, CA and at 257 East Sierra Street, Unit E, Portola CA. Remote call-in locations open to the public are located at the Plumas County Public Health Agency, 270 County Hospital Rd., Suite 206, Quincy, CA and at Hock Engineering, 328 Main Street, Suite 3, Chester, CA.
